

Jamie Duskpaw – Terms and Conditions – Personal License

Rules

What You CAN Do

1. Customize the model and textures for yourself.
2. Modify the files for use in other applications (Unity, VRChat, Unreal Engine, Source Filmmaker, etc.).
3. Make 3D animations or other visual content with the model.
4. Use the model for your own commission work, as long as you stay in bounds of your acquired license.

What You CAN'T Do

1. Re-sell or redistribute the entire, or parts of the content.
2. Share any assets, unless both parties have purchased the original assets.
3. Re-sell the content together with other assets where the main purpose of the sale is redistributing the model.
 - e.g. You are not allowed to bundle the model together with a funny hat and resell that joined product, as it is clear that the biggest contribution to it is this model.
 - You can however use the model in a game of yours and sell that, as long as the game consists of many more parts than just the model.
4. Use these assets in a manner intended to cause or encourage harm to others, or to promote a politically or religiously motivated message or agenda. This includes but is not limited to, modification of the assets, or using the assets in association with such purposes.

What You MUST Do

1. Give credit whenever you post a piece of content which is making use of the model.

Personal License:

By purchasing this product with the Personal License, you are allowed to use it for an unlimited number of personal projects which do not give you a monetary benefit.

You can use it for studies, learning about rigging, posing and animating, porting it to other applications, as well as making art and sharing it online.

Commercial License Use Across Model Variants/Skins

The commercial licenses are valid for all purchases of the same base model. That means that if you acquire a commercial license for **one** of my Jamie Duskpaw models, regardless of its skin, it also applies to **all other** Jamie Duskpaw variants you've purchased.

So to make money with any of them, you need to purchase a commercial license for one of them, and only personal licenses for the others.
